

2D1435 Neuronnätts- och Biomodellering

Läsanvisningar för Bower, J. M. and Beeman D.: The book of GENESIS, utdrag, Kapitel 2 and 5.

Anvisningar: 1 = detaljkunskap; 2 = kunskap, 3= orienterande. Siffror angivna för överordnat kapitel avser endast den inledande delen av detta kapitel, ej separat angivna underavsnitt.

2	COMPARTMENTAL MODELING	2
2.1	MODELING NEURONS	2
2.1.1	Detailed Compartmental Models	1
2.1.2	Equivalent Cylinder Models	1
2.1.3	Single and Few Compartment Models	1
2.2	EQUIVALENT CIRCUIT OF A SINGLE COMPARTMENT	1
2.3	AXONAL CONNECTIONS, SYNAPSES, AND NETWORKS	2
2.4	SIMULATION ACCURACY	2
2.4.1	Choice of Numerical Integration Technique	3
2.4.2	Integration Time Step	3
5	CABLE AND COMPARTMENTAL MODELS OF DENDRITIC TREES	
5.1	INTRODUCTION	2
5.2	BACKGROUND	2
5.2.1	Dendritic Trees: Anatomy, Physiology, and Synaptology	3
5.3	THE ONE-DIMENSIONAL CABLE EQUATION ¹	
5.3.1	Basic Concepts and Assumptions	2
5.3.2	The Cable Equation	2
5.4	SOLUTION OF THE CABLE EQUATION FOR SEVERAL CASES ²	
5.4.1	Steady-state Voltage Attenuation with Distance	2
5.4.2	Voltage Decay with Time	2
5.4.3	Functional Significance of λ and τ_m .	2
5.4.4	The Input Resistance R_{in} and "Trees Equivalent to a Cylinder"	1
5.5	COMPARTMENTAL MODELING APPROACH	1
5.6	COMPARTMENTAL MODELING EXPERIMENTS	2
5.7	MAIN INSIGHTS FOR PASSIVE DENDRITES WITH SYNAPSES	1
5.8	BIOPHYSICS OF EXCITABLE DENDRITES	1
5.9	COMPUTATIONAL FUNCTION OF DENDRITES	1
